

fighting, dying, and living for. We know because from every corner of the earth, the down trodden, the disenfranchised, and the oppressed come to seek out this dream. We know America is the beacon of hope and change, we can see it in the diversity of our citizenry.

On September 11, 2001, a generation blanketed by the quilt of peace and tranquility was awakened. This quilt of peace, stitched with the blood, sweat, and tears of brave American soldiers, was torn in a manner unimaginable only two months ago. Today, a generation comforted by a freedom so deep, so common, so prevalent, and so easily taken for granted, can more easily identify the price for which it was paid.

This generation is reminded that the sacrifice of Americans made our way of life possible. Young Americans with dreams in their eyes and hope in their hearts, bought our freedom. The tears of families who lost loved ones were exchanged for our security. The peace that we have come to know, was purchased by men and women that so loved our country that they risked and often gave their lives—ensuring that freedom is not only a concept that we dream about, but a reality that we live.

So it is with gratitude and the utmost respect that we remember those who fought, and those who were lost for the love of our nation. We move forward more vigilant, more aware, and more determined. As we pay tribute to our nation's freedom fighters, we stand with a new pride in America. Our hopes and prayers go out to those who are deployed, even now, to carry the torch in the fight for freedom. At the dawning of a new day of uncertainty, we can look to the American values of freedom, justice, and equality to lead us to peace. We thank the countless heroes, our veterans, for giving their freedom and their lives, so that we may live free.

HONORING THE MARIAN MEDICAL CENTER WEST

HON. LOIS CAPPS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mrs. CAPPS. Mr. Speaker, today I would like to pay tribute to the most recent addition of the Marian Medical Center, the Marian Medical Center West.

Since its inception on May 20, 1940, the Marian Medical establishment has found the perpetual need to keep expanding in order to better serve the growing community of Santa Maria, California. In 1940, eight Sisters of St. Francis of Penance and Christian Charity were assigned to Santa Maria to manage and staff a hospital for the growing community of approximately 8,000 people. The new facility was named Our Lady of Perpetual Help Hospital, by its first administrator, Sister Noella Dieringer.

Three years later, in 1943, the 1000th baby was born at the hospital, and it became apparent that the Santa Maria community was growing fast. Sister Marilyn Ingram worked hard to secure land in the Santa Maria area, and, through the generosity of Captain and Mrs. Allan Hancock, a new facility, Marian Hospital, was able to open its doors in 1967.

Today, the Marian Medical Center has expanded to include a 130 bed acute care hos-

pital, a 95 bed extended care center, a dialysis unit, a home health agency, infusion services, a hospice program, and outpatient healthcare services. Yet as the Santa Maria community continues to grow, the medical center must expand as well. The addition of the Marian Medical Center West will help alleviate overcrowding in the hospital's main facility by providing 36 inpatient beds and expanded outpatient facilities.

The Marian Medical Center has provided services to thousands of Santa Maria residents over the last 60 years and with the addition of the new center thousands of more citizens can be served in the future. I am honored to have the opportunity of recognizing the Marian Medical Center West on its grand opening, and it pleases me that this facility continues to prosper.

HONORING JAMES KRAMER AND BRIAN COTTER

HON. SCOTT McINNIS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. McINNIS. Mr. Speaker, all Americans have been going through very trying times since the terrorist attacks on September 11, 2001. Despite our struggle, we have pulled together and become a stronger nation due to the resolve of our citizens. Today, I would like to recognize two patriots from Pueblo, Colorado who have made significant contributions to our nation's recovery efforts.

Pueblo County Coroner James Kramer, and Brian Cotter, a mortician, were members of the Disaster Mortuary Response Team that went to New York City to aid in the recovery effort at the World Trade Center disaster site. They were at ground zero with other forensic pathologists helping to recover and identify the individuals who we lost in the disaster.

Mr. Speaker, James Kramer and Brian Cotter committed their expertise to our country during an overwhelming time of need. Just as we have seen with the rest of the country, both James and Brian provided some stability to our nation at a time of crisis. I am proud to have this opportunity to recognize these upstanding individuals for their significant contributions to the recovery and relief effort in New York City following the World Trade Center disaster. James Kramer and Brian Cotter deserve our recognition and praise.

TRIBUTE TO STUDENTS OF NORTH ELEMENTARY SCHOOL IN TAYLORVILLE, IL

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. SHIMKUS. Mr. Speaker, I rise today to pay tribute to the students of North Elementary School in Taylorville, Illinois, and their important and heartwarming efforts to help those affected by terrorism.

On October 11th, 2001, President Bush made a request of the children of America. He challenged each of them to earn and send in one dollar. This money, sent by the kindness

of the children of the United States, will be used to reach out to the unfortunate children in far off Afghanistan.

The students of North Elementary School heard and met that challenge. I recently received a check for \$348.00, made out to America's Fund for Afghan Children—that's one dollar for each student in North Elementary. But this was only a part of the total money the students raised. In fact, through a variety of efforts in the month of October—including a Student Council penny drive and a PTA sponsored fundraising dinner—the students of North Elementary managed to gather an amazing sum: \$1,668, over five times what our President requested. The remainder of the money, it was decided, will go to the Red Cross to aid victims of the September 11th tragedy here in the United States.

The students, parents, faculty, and members of the Taylorville community should be recognized for their fine efforts. The terrorists believed they could accomplish their goals with the murder of American innocents; but the American citizens have responded with aid to the innocents of Afghanistan. Nothing else could better show how utterly Al Qaeda has failed.

Mr. Speaker, as President Bush said in his announcement of the Fund for Afghan Children, "One of the truest weapons that we have against terrorism is to show the world the true strength of character of the American people." The children of North Elementary have shown that character, and they deserve our thanks. May God bless them, and may God bless the United States of America.

TRIBUTE TO DR. CLARENCE ROMERO

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. CALVERT. Mr. Speaker, it is an honor today to rise and pay tribute to Doctor Clarence Romero, associate professor of psychology, at Riverside Community College upon being named the 2001 United States Professor of the Year. My congressional district is privileged to have Dr. Romero teaching our young adults as he is one of only four awardees recognized each year for extraordinary dedication to undergraduate teaching.

Skillful, enthusiastic and innovative teachers change the lives of countless students for the better by encouraging curiosity and understanding and by contributing to the development of mind and spirit.

The United States Professors of the Year program, presented by The Carnegie Foundation for the Advancement of Teaching and directed by the Council for Advancement and Support of Education, is the nation's most highly respected program to recognize outstanding faculty. The Professor of the Year represents the thousands of dedicated university and college instructors throughout the nation who serve their students, their community and their state with vigor and talent.

Mr. Speaker, the United States has long supported excellence in undergraduate teaching through competitively funding faculty salaries and other initiatives making our system of higher education the envy of many nations.

The quality of life and the scope of opportunity for many future citizens will be determined by the quality of teaching in the classroom.

Therefore, I join with all of the citizens in my district in thanking and congratulating Dr. Clarence Romero as he is honored for his devotion to teaching the young minds of our future generations.

HONORING DANIEL S. GOLDIN AS
THE LONGEST SERVING ADMIN-
ISTRATOR OF THE NATIONAL
AERONAUTICS AND SPACE AD-
MINISTRATION

HON. BART GORDON

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Mr. GORDON. Mr. Speaker, I rise today to commend Dan Goldin, who is leaving his position as administrator of the National Aeronautics and Space Administration. Dan, who was appointed on April 1, 1992, is the longest-serving administrator in the history of NASA. On March 5, 2001, his time in office surpassed that of James Fletcher, who held the previous record of nearly nine years during two separate terms.

As ranking member of the Committee on Science's Subcommittee on Space and Aeronautics, I have worked with Dan for many years. I have learned that his passion is not limited to the exploration of space. He also cares deeply about the possibilities of science and space to inspire life on Earth. I certainly know that many students in Middle Tennessee have been encouraged and inspired by Dan's vision for space exploration.

Dan initiated his tenure at NASA by leading an agency-wide process to define a NASA Strategic Plan as the consensus definition of the agency's mission and goals. The core guidance in this document states: "NASA's mission success starts with safety. A commitment to safety permeates everything we do." Dan has not wavered in enforcing this priority in every aspect of the agency on the ground and in space.

During Dan's tenure, the International Space Station went from the drawing boards to a fully functional, permanently staffed orbital research laboratory. He directed the Space Station redesign, holding together the coalition of international participants while incorporating the former Soviet Union hardware elements into the design. By developing the cooperative Mir research program with Russia, he enabled Space Station partners to conduct long-term space flight research even before the International Space Station was operational.

Dan's comprehensive strategy for space exploration is exemplified by the "Origins Program." He initiated this program with objectives to understand how the universe has evolved, to learn how life began on Earth, and to see if life exists elsewhere. He formulated a rescue plan for the installation of a "contact lens" on the Hubble Space Telescope, leading to startling discoveries of the cosmos. Dan has challenged the Origins scientists to search for Earth-like planets within 100 light years of Earth. He also has laid the foundation to complete the first scientific census of the solar system and to send the first probe into Interstellar space.

Dan has been a vigorous proponent for increased exploration of Mars. He has established a series of robotic missions that will visit the planet every two years for the next decade and has assured that the public will share in the excitement of Mars exploration. His direction to provide Internet access for the Mars Pathfinder mission resulted in more than three-quarters of a billion "hits" from people tuning in to the site.

In 1998, Aviation Week & Space Technology magazine honored Dan with the Laurel Award for outstanding achievement in aviation and aerospace. The award was presented along with the commentary that Dan has "delivered on his promise to reshape NASA into a model government agency."

This year Dan was awarded one of one of France's highest and most distinguished honors: the "Officer of the Legion of Honor." This award recognized his contribution to the development and broadening of American-French civil space cooperation through cooperative ventures including the International Space Station, Mars exploration, Earth observations, and the flight of French astronauts aboard the Space Shuttle.

Under Dan's leadership NASA has reached out to honor the victims of last month's terrorist attacks in New York. The next mission of the Space Shuttle Endeavour will carry "Flags for Heroes and Families." Thousands of American flags will be carried into space by Endeavor and its seven member crew and, upon return to Earth, will be distributed to the victims' families and survivors of the September 11 attacks.

Dan always recognized NASA's potential to inspire students to elect careers in science mathematics and engineering. His personal leadership and the NASA programs that he supported have involved hundreds of students in hands-on research experiences. NASA's Summer High School Apprenticeship Research Program not only allows the students to actually participate in research, but it also pays them a salary as well. This intensive science and engineering apprenticeship program is specifically designed to attract and increase under-represented students' participation and success rates in mathematics, science, technology and engineering courses.

Mr. Speaker, the nation is fortunate to have such outstanding public servants as Administrator Goldin. He has led NASA and its international partners in exploring the frontiers of space and inspiring benefits to life on Earth. Accordingly, it is appropriate today that we recognize and highly commend Daniel Goldin as the longest serving administrator of NASA and that we express our appreciation for his leadership of the nation's space program.

ECONOMIC SECURITY AND RECOVERY ACT OF 2001

SPEECH OF

HON. BILL LUTHER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 24, 2001

Mr. LUTHER. Mr. Speaker, the events of September 11th have transformed the policy agenda for our nation. Over the past six weeks, we have witnessed truly heroic acts by individuals and organizations on behalf of the

victims and their families. We have also seen this body work in a truly remarkable bipartisan fashion. In short, the nation has united behind a cause in a manner we have not seen in over a generation.

Our global campaign to root out terrorism will be a long-term commitment requiring patience and, most importantly, sacrifices from all involved. Previous generations have endured and prevailed in unified international efforts in the name of freedom and democracy—and they all required patience and sacrifices from the American people. In this vein, I believe any economic stimulus package passed by this Congress should reflect the reality that our top priority must be to drive the war effort while improving security and maintaining prosperity at home.

Unfortunately, H.R. 3090 is not that kind of package. \$10 billion is devoted to reducing the capital gains tax, a proposal that Alan Greenspan recently told Congress would have virtually no stimulative economic value. In addition, not one dollar goes to important infrastructure improvements to secure our airports, seaports, dams and power plants, or to protect us from bioterrorism. A responsible stimulus package should include meaningful provisions to improve security for the American people. This would, in turn, contribute to consumer confidence and create a positive ripple effect through the economy.

This Congress needs to continue the bipartisan approach of the past few weeks and develop a stimulus package that truly serves the interests of our country. This is not the time to be passing legislation that is little more than a grab bag of goodies for special interests. Rather, this is the time to be appealing to the greater good of the American people. They are willing to do what it will take to win this war—we just need leadership in Congress that measures up to the courage and will of the American people.

TRIBUTE TO ROBERT ROUMIGUIERE

HON. LYNN C. WOOLSEY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 8, 2001

Ms. WOOLSEY. Mr. Speaker, I rise today to honor Robert Roumiguere, a Marin County political leader who served on the Board of Supervisors for 22 years. Mr. Roumiguere died on November 5, 2001, of a heart attack.

Mr. Roumiguere will be remembered especially for his role in creating parks in Central Marin and preserving open space on the County's ridgelines. He was also instrumental in securing acquisition of the Northwestern Pacific railroad right of way in hopes of creating commuter rail service and fought for improvements to the Highway 101 Freeway and use of Hamilton Field as a business hub.

As a fiscal watchdog, Mr. Roumiguere sought to curb county spending. His tenacious negotiating style focused on bringing stakeholders together to find common ground. He was able to work with both Marin business community and environmentalists to achieve consensus.

After his 22 years as Supervisor, Mr. Roumiguere served on the county employees' retirement board. He had a background in
